About Me

Information Systems graduate from Universitas Airlangga (**GPA 3.74/4.00, Cum Laude**) with experience in **full-stack development (Laravel, PHP)** and **machine learning**. Improved backend performance and system reliability at SEVIMA, and mentored **25 students** at Bangkit Academy with a **100% completion rate**.

Experience

Software Engineer

Surabaya, ID

SEVIMA (PT. Sentra Vidya Utama)

Nov 2024 – May 2026

- Maintained the **Alumni Tracer Study Module (Next.js, Lumen, PHP)**, delivering UI/UX enhancements, API performance improvements, and **SSO** integration to streamline access across the SEVIMA ecosystem, serving 500+ institutional clients.
- Maintained and enhanced **SIMKERMA** (Collaboration Management System) using **Laravel and PHP**, implementing **public partner evaluation** features and advanced **Excel import/export workflows** with duplicate validation, seamless bulk processing, selective insertion for new records only, automated error-file generation for failed imports, role-based access management, reporting enhancements, and various internal system improvements
- Developed a career services platform using **Laravel**, integrated with the **SIKAD Cloud** ecosystem to streamline job applications, profile management, and career recommendation services, along with implementing various system improvements
- Enhanced an internal **Applicant Tracking System (ATS)** for the Human Capital division using **Laravel and Livewire**, managing a database of 10,000+ applicant records by revamping the **landing page** and **applicant experience** with a modernized UI.
- Implemented and maintained **training.sevima.com**, overseeing **payment gateway integrations**, automated email systems, and digital certificate distribution workflows.
- Resolved **700+ technical tickets** within an Agile framework, delivering 86 feature enhancements and 256 bug fixes.

Machine Learning Mentor

Remote

Bangkit Academy (by Google, GoTo, Traveloka)

Feb 2024 – July 2024

- Guided a cohort of **25 students** to a **100% graduation rate** by delivering 19 technical consultation sessions and supporting 14 instructor-led training (ILT) sessions.
- Maintained consistently high satisfaction scores with an average rating of **4.85/5.00** for consultations and **4.83/5.00** for instructor-led training.
- Partnered with Instructors to moderate live sessions, facilitating technical Q&A and ensuring smooth delivery of the curriculum to over 100+ participants.
- Monitored individual student progress, intervening with personalized coaching to ensure all project milestones were met on schedule.

IT Developer Intern (MSIB Batch 5)

Jakarta, ID

PT. United Tractors Tbk

Aug 2023 – Dec 2023

- Selected for the prestigious **MSIB Batch 5** program from a highly competitive pool of **11,582 applicants** (0.8% acceptance rate).
- Engineered a web-based **Asset Tracking System** for the CHCU Division using **Laravel and Livewire**, reducing manual tracking errors.
- Developed an automated **Notification Module** for overdue assets and a **Bulk Return** feature, significantly streamlining the return process for high-volume inventory.
- Architected an **Audit Stock Opname** module and enhanced dashboard analytics to deliver accurate data, precise inventory control, and reporting.

Education

Universitas Airlangga

Surabaya

S.Kom., Bachelor of Information Systems; **GPA: 3.74/4.00 (Cum Laude)**

Sept 2020 – Aug 2024

- Bangkit Academy 2023 by Google, GoTo, and Traveloka — Machine Learning Path
- TOEFL ITP Score: 577 (Reading: 65 — C1, Listening: 62 — C1)

Certification

Junior Web Programmer BNSP | bit.ly/bnsp-rais

2024 - 2027

Implementation of User Interface, Writing Code According to Guidelines and Best Practices, Implementation of Structured Programming, Utilizing Existing Libraries or Components

Certified TensorFlow Developer | bit.ly/tfdc-rais

2023 - 2026

This certificate program requires an understanding of building TensorFlow models using Computer Vision, Convolutional Neural Networks, Natural Language Processing, as well as real-world image data strategies.

Achivement

P2MW Funding for Digital Business Category; Finalist; Finalis

August 2023

Speaker at HackFest Workshop on Flutter State Management (GDSC Unair)

March 2023

IDCamp Scholarship for Advanced Android Developer Track; Scholarship Recipient

February 2023

DCamp Scholarship for Intermediate Android Developer Track; Scholarship Recipient

September 2022

Governor of DIY Achievement Award (Anugerah Prestasi); Scholarship Recipient | [link](#)

Nopember 2018

National Level Kihajar Mobile Application Competition; 2nd Place Winner | [link](#)

October 2018

Project

Automatic Exploratory Data Analysis (Python, Flask, Dash)

Juni 2023

- Engineered a robust web application that accepts user-uploaded files (CSV) and generates comprehensive EDA reports featuring dynamic visualizations, descriptive statistics, and quantitative analyses for continuous, categorical, and textual data.
- Designed and implemented an accessible web dashboard using Flask and Dash
- Project Link : bit.ly/eda-rais

Agronify Image Classification Model (Machine Learning)

Juni 2023

- Developed an advanced deep learning model to classify images and detect leaf diseases across various crops.
- Successfully implemented a robust machine learning architecture leveraging the MobileNet framework to develop eight distinct classification models, achieving an average accuracy of 98% and maintaining a loss rate below 4%. Demonstrated exceptional model efficacy in accurately identifying plant diseases, enhancing agricultural diagnostic processes.
- Project Link : bit.ly/agronify

AksaraKu Android Application (Android Application)

Oktober 2018

- Engineered an innovative Javanese script learning app using Java and Android Studio.
- Secured 2nd place at the 2018 National Kihajar Application Competition, organized by the Multimedia Education and Cultural Development Center, Ministry of Education, Culture, Research, and Technology of Indonesia.
- Project Link : bit.ly/ME18LOMP02

Skills

Programming & DB: PHP, Python, Javascript, CSS PostgreSQL, MySQL

Frameworks / Library: Laravel, Tensorflow, Flutter, Vue, React, TailwindCSS, Flask, JQuery

Developer Tools: Jenkins, Archimate, Android Studio, Unity, QGIS, Docker, Jupyter Notebook, Git, Metabase

Organizations

Mahasiswa Masjid Ulul Azmi Unair

Jan 2023 – Jan 2024

Head of Media Division

Google Developer Student Clubs Unair

Sept 2022 – Jul 2023

Curriculum Core Team

AjakJago

Dec 2022 – April 2023

Web Development Manager
